

### Application

Suitable for interior, top hung sliding panels.

Ideal for sliding panels and shutters in residential and commercial applications. Versatile design allows the opening to be covered by any number of panels.

The aluminium track may be fitted directly to the lintel, in single or multiple lines, or face fitted to the lintel using a single line of brackets or the specifically designed face fix track. Fascia accessory with end caps also available.

Hangers come standard with a steel bracket and four nylon tyred wheels with precision bearings. Clip stops provided but can be upgraded to a soft close device for improved operation.

### Panel Specification

|                        |                          |
|------------------------|--------------------------|
| <b>Track System:</b>   | <b>Zero Clearance 60</b> |
| For Individual Panels: |                          |
| Max Panel Weight       | 60kg                     |
| Max Panel Height       | 2400mm                   |
| Min Panel Thickness    | 28mm*                    |

\*(Applies to single panels, maximum panel thickness may vary for bi-passing panel applications)

### Standard Sets and Packs

Sets comprise of top track, brackets or face fix track, hangers, clip stops or soft closes, guide, spanner and timber screws.

| Set No.        | Panel width     | Track Length | Qty Brackets   |
